

AVIDHIFI

VOLVERE™

"Magnificent sense of focus and stability,
whatever the material played"

Welcome, to the next level of true audiophile quality.

The Volvere, comes complete with a precision 6.7kg aluminium platter, directly mounted onto our unique inverted bearing system, it is time to finally hear the music.

Sharing the same philosophy as our reference models, The Volvere has a true audiophile engineered quality.

Such as our unique sapphire bearing and clamping system which efficiently channels unwanted vibrations away from the record to the chassis. This gives new clarity to your vinyl; the performance is not veiled but vivid and transparent.

Isolating the main chassis is critical to maintaining low colouration. We have employed a tripoint sprung suspension system with an ultra-low frequency, the result is information retrieval and resolution that's out of this world.

The Volvere offers people the chance to step into a new world of quality audiophile vinyl reproduction, that puts the music first.

It's reassuringly an AVID turntable that punches well above its substantial weight.

SPECIFICATIONS	
DRIVE	Twin Belt Drive
SPEEDS	33.3 & 45.0 RPM (Adjustable)
PLATTER MASS	6.7kg
PLATTER MATERIAL	Aluminium
BEARING	Inverted Satinless Steel
THRUST POINT	Tungsten Carbide / Sapphire
