

AVIDHIFI

CELSUS POWER AMPLIFIER™

"This is what true evolution looks & sounds like"

Refined from our reference range, much of the components and design have been transplanted, implementing our unwavering commitment for the ultimate listening experience in each price class. Seamless harmonisation of authoritative sound with handcrafted technology means this is far more than just a status symbol but a sonic weapon to elevate every moment of your musical enjoyment.

Common to our larger amplifiers, there is a massive power transformer and current reserves just bursting to make sure that even the largest crescendos are conveyed with their full force. Voices have an astonishing stability and space around them, making the musical experience captivating. Whilst there is immense power there is also control and a delicacy that allows the inner detail to be fully revealed with startling reality.

Designed to thrill the senses or relax the atmosphere, whatever takes your mood, it will surpass all expectations and keep you exploring your collection over and over again. Happy to be a stand-alone component, but obviously there is a natural attraction to the partnering Pre-Amplifier, a synergy of connections making for a perfect musical coupling.

SPECIFICATIONS	
POWER	
Output	150W @ 8 Ohms
Harmonic distortion	<0.003% (80% Power 8 Ohms 1kHz)
Power supply	1.5kVA Mains Transformer
Capacitor reserve	188,000uF
Voltage input	115V or 230V (region dependant)
Power consumption	500W MAX
Channel separation	91dB
Unbalanced/Balanced	YES/YES
INPUTS	
Balanced inputs	2 x XLR / 2 x RCA
Mains input socket	IEC C14 TYPE
Mains input cable	IEC C13 TYPE
OUTPUTS	
Outputs	2 sets AVIDHIFI Gold plated custom binding posts (Pairs)
Impedance range	4-16 Ohms
DIMENSIONS AND WEIGHTS	
Dimensions (WxDxH)	469 x 458 x 196mm (including rear handles)
Net weight	31.7Kg (70lb)
Packaging	600 x 560 x 240mm (WxDxH)
Shipping weight	37Kg (82lb)
