## REFERENCE TWO™

"A truly realistic listening experience"

Derived from its big brother with a less imposing appearance but giving nothing away in terms of sonic transparency and allowing you to enjoy thrilling crescendos, vast open soundstages and stunning bass power you will actually feel, the Reference Two will immerse almost any room with a sense of realism and power. Truly a realistic listening experience.

Hewn from solid aluminium, every stunningly sculpted component is handcrafted together to form an ultra-rigid metal monolith. Within the rigid cabinet is two Reference Midrange drivers, using our compression plate mounting and mass damping system you are assured to hear a colouration free sound that is sweet and natural. Suddenly you are rediscovering your music collection not listening to your speakers.

### SPECIFICATION
