## REFERENCE FOUR™

"The detail is really phenomenal"

The sound performance from our compact stand mounted loudspeaker will redefine your expectations of what is possible.

Mirroring the clarity and dynamics of our other Reference loudspeakers and awesome bass power that belies its size, customers with limited space need look no further.

Compact perhaps but bursting with technology from our other models. Featuring our Tuned Mass damping Technology Channelling unwanted vibration that you normally feel in the loudspeaker cabinet to our TMT™ element, then add to that, our bespoke 360° bass reflex difuser minimising location issues and producing a wonderful unfatiguing clarity of sound.
